

'TOWARDS ONE WORLD' - GOAT PROJECT

U P D A T E

2 0 2 6

INTRODUCTION:

2025 has been a year of many challenges in Zimbabwe, especially on the economic side of things. Rural churches and circuits continue to experience poverty and hunger in many places in our nation.

APPRECIATION

The Seed of Grace International funding has been upheld by the beneficiaries as one of the very best initiative to fight poverty through the Goat Project.

THE FOUR CIRCUITS

The four circuits namely: Sadza—Murewa South—Zviyambe—Gunde are appreciating the seed money SGI gave to them to kick start the Goat Projects. Some circuits have started seeing the benefits whilst others are still growing their stock.

SADZA CIRCUIT

December 2025

The project started in May 2024

- we kick start with 10 female goats
- between November 2024 and January 2025 they all give birth, 1 aborted, 2 kids died we remain with 8 kids 5 males and 3 female
- in September 2025 we sold 5 males
- at the moment we have 13 female goats
- in July and August 2025 2 goats give birth while 2 goats aborted.
- in November and December 2025 6 female goats all give birth while 1 kid died
- this means we have 7 kids 3 kids are female 4 are male.
- we have 13 goats plus 7 kids therefore in total is 20 .

Thank you God bless you

Continued/

MUREWA SOUTH CIRCUIT

We received the amount of \$200 from seed of Grace on the 15th of July 2025 to run the GOAT Project

From this money we managed to buy 7 (seven) goats at 30 USD each and all females. We are pleased to have a new born goat born on 17th of September.

So far no deaths occurred. We however have given each society a goat to keep as a way of seeding whilst we are securing a good place where they can be kept at one point

FUTURE PLANS

- 1.We have secured another usd\$180 from eggs profits to buy more goats.
- 2.We intend to secure an ideal place conducive for this project
- 3.We expect to start harvesting next year based on their increase in number
- 4.We expect to incorporate our church youths to empower them on goat keeping for sustainability.
- 5.We also have scheduled our calendar to meet quarterly for project evaluation.
- 6.We have plans to secure enough maize after 2026 harvests for goat feeds.

Thank you
